■ Capture Ideas on the Go: Voice → Transcript → Lesson Plan

Teachers often have their best ideas while walking, driving, or between classes. This guide shows quick workflows for capturing, transcribing, and transforming those ideas into usable lesson plans or professional notes.

ANDROID

Pixel Recorder	Open Recorder → Record → Save → Share Transcript/Audio. Sync at recorder.google.com.
Samsung Voice Recorder	Record → Tap file → Transcript Assist → Share text/audio.
Google Keep (any phone)	Open Keep → + → Audio → Speak. Saves audio + instant text.
Gboard Dictation	In any text box tap keyboard mic → Speak → Text appears.

IPHONE / IPAD

Voice Memos (iOS 18)	Record → Transcript appears → Share transcript or audio.
Notes app (iOS 18)	Notes → New note → Audio → Transcript + summary.
Older iOS / fallback	Use Just Press Record (1-tap record + transcript + iCloud). Or use keyboard mic dictation.

CROSS-PLATFORM TOOLS

Microsoft Word Online	Upload audio → Transcribe → Insert text into doc.
Otter.ai	Tap Record or upload → Transcript with speaker IDs → Export text.

WORKFLOW: IDEA → LESSON PLAN

1. Capture	Record your thought using your phone's voice app.
2. Transcribe	Convert to text with Recorder, Voice Memos, or Word/Otter.
3. Transform	Paste transcript into an AI tool. Example prompt: 'Turn this brainstorm into a 45-min 7th grade lesson plan

PRACTICAL TIPS

• Airplane mode still records; transcription may wait until online.
• Add recorder apps to home screen for one-tap capture.
• Use file names like YYYY-MM-DD Topic for easy search.
• Avoid student names in third-party apps unless approved.
